**Engineering Measures:**

The work area(s) should be equipped with showers, eyewash stations, and ventilation systems.

Use of adequate ventilation should be sufficient to control worker exposure to airborne contaminants. If the use of this product generates dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits.

**Personal Protective Equipment:**

**Respiratory Protection**

If exposure limits are exceeded or irritation is experienced, a NIOSH/MSHA approved respiratory protection should be worn.

**Hand Protection**

No special technical protective measures are necessary.

**Eye Protection**

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary.
Skin and Body Protection
Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific workplace.

Hygiene Measures
Handle in accordance with good industrial hygiene and safety practice.
