

Going to the Exact Length with Duro-Last X:

Manufactured with the same formulation as the industry-leading Duro-Last[®] membrane, Duro-Last X is available in 50, 60, and 80 mil thickness, and is an excellent choice for contractors seeking the convenience of roll goods coupled with the customization of custom-cut lengths. Designed to reduce scrap and improve installation efficiency over traditional roll goods, the Duro-Last X membrane is available in 10-foot wide rolls that can be custom-cut to any length up to 200 feet.

Duro-Last X can be applied using a variety of methods:

- **Duro-Bond[®] Induction Welding:**

A non-penetrating technology that bonds the membrane to a specialty-coated fastening plate.

- **Adhered:**

Duro-Last offers several adhesive options for applying the roof membrane to the deck surface.

- **Mechanical Attachment:**

Fasteners and plates are used to securely attach sections of membrane to the roof deck.

Precision-Fabricated Accessories:

Duro-Last X has its own complete line of compatible custom-fabricated flashings, skirted edge metal made by EXCEPTIONAL[®] Metals, and other roofing system components. Custom-fabricated flashings are manufactured with Duro-Last membrane material and feature a weft-inserted scrim that provides puncture and tear resistance along with tensile strength at transitions – the most critical areas of any roof installation.

Comprehensive Warranty Coverage:

Unique in the industry, Duro-Last offers a 15-Year Supreme Warranty with consequential damage coverage for commercial applications of the Duro-Last X membrane. Additional Supreme warranties, as well as our Basic, Ultra, and Residential warranties are also available. Hail and high-wind warranties can also be obtained for Duro-Last X installations.
