

### The Duro-Last Difference:

The Duro-Last flagship membrane is a proprietary thermoplastic formulation which provides exceptional flexibility and reflectivity. Available in 40, 50, and 60 mil thicknesses, the Duro-Last membrane can be custom-fabricated to meet the exact specifications of the building. With the custom-fabricated Duro-Last Roofing System, up to 85% of seams can be completed in our factory-controlled environment, dramatically reducing rooftop labor and the potential for leaks. Additionally, the Duro-Last membrane features an 18-by-14 weft-insertion anti-wicking scrim, providing superior strength and puncture resistance.

### The Duro-Last Membrane can be applied using a variety of methods:

- Duro-Bond® Induction Welding: A non-penetrating technology which bonds the membrane to a specialty-coated fastening plate.
- Adhered: Duro-Last offers several adhesive options for applying the roof membrane to the deck surface.
- Mechanical Attachment: Fasteners and plates are used to securely attach sections of membrane to the roof deck.

### Precision-Fabricated Accessories:

The Duro-Last Membrane also features its own complete line of compatible custom-fabricated flashings, skirted edge metal made by EXCEPTIONAL® Metals and other roofing system components. Custom-fabricated flashings are manufactured with Duro-Last membrane material and feature a weft-inserted scrim which provides puncture and tear resistance along with tensile strength at transitions - the most critical areas of any roof installation.

### Comprehensive Warranty Coverage:

Unique in the industry, Duro-Last offers a 15-Year Supreme Warranty with consequential damage coverage for commercial applications of the Duro-Last Roofing System. Additional Supreme warranties, as well as our Basic, Ultra and Residential warranties are also available. Hail and high-wind warranties can also be obtained for Duro-Last installations.

## Color Swatches:

### DURO-LAST MEMBRANE

MIL	40	50	60
Weight	0.22 lb./sq. ft.	0.29 lb./sq. ft.	0.36 lb./sq. ft.
Scrim	18 x 14	18 x 14	18 x 14
Custom Dimensions	Deck sheets up to 2,500 ft. <sup>2*</sup>	Deck sheets up to 2,000 ft. <sup>2**</sup>	Deck sheets up to 1,500 ft. <sup>2***</sup>
PVC Film Above Scrim	17 mil	28 mil	28 mil

\* Maximum length or width of 100 feet in either direction

\*\* Maximum length or width of 80 feet in either direction

\*\*\* Maximum length or width of 60 feet in either direction. 60 mil sections are delivered on carpet rolls only and may be ordered with a maximum sheet length of 24 feet, as the carpet roll is 25 feet long. When shipped, the rolls may be wrapped in a different colored membrane for membrane protection.
