

### **Duro-Last EV: The PVC roof membrane containing Elvaloy® KEE:**

The Duro-Last EV membrane is an excellent choice for low-sloped projects that require a long-lasting, energy-efficient roofing system that offers resistance to both weather and chemical attack.

---

### **Superior Watertight Protection for All Installations:**

Duro-Last EV single-ply membrane incorporates established membrane chemistry, exceptional strength from an 18 x 9 weft insertion scrim, and superior film thickness above the scrim. This product is available in 50 and 60 mil and offers excellent rooftop weathering performance, great weldability, chemical resistance and exceptional longevity. Duro-Last EV roll goods enable an easier installation on challenging, cut-up roofs; roofs that are difficult to measure; and projects in cold or extreme weather.

---

### **Benefits of Elvaloy KEE:**

The Duro-Last EV membrane is made with KEE, or Ketone Ethylene Ester, a polymer that can replace plasticizers in roofing membranes and is designed to promote flexibility. Manufactured solely by DuPont™, Elvaloy KEE can be mixed with PVC to provide exceptional reflectivity, chemical resistance, and weather resistance – the same features that make the core Duro-Last system the “World’s Best Roof®”.

---

### **Duro-Last EV roll goods can be applied using a variety of methods.**

- **Duro-Bond® Induction Welding:**  
A non-penetrating technology that bonds the membrane to a specialty-coated fastening plate.
- **Adhered:**  
Duro-Last offers several adhesive options for applying the roof membrane to the deck surface.
- **Mechanical Attachment:**  
Fasteners and plates are used to securely attach sections of membrane to the roof deck.

**Precision-Fabricated Accessories:**

Duro-Last EV has its own complete line of compatible custom-fabricated flashings, skirted edge metal made by EXCEPTIONAL® Metals, and other roofing system components. Custom-fabricated flashings are manufactured with Duro-Last EV membrane material and feature a weft-inserted scrim that provides puncture and tear resistance along with tensile strength at transitions – the most critical areas of any roof installation.

**Comprehensive Warranty Coverage:**

Multiple warranty options for Duro-Last EV installations are available, including our Basic, Ultra and Residential warranties. Duro-Last EV warranties are also available for installations in high-wind areas. Consequential damage coverage will not be offered for Duro-Last EV.

**DURO-LAST EV: AVAILABLE SIZES**

MIL	50	60
Weight	.28 lb/sq ft	.30 lb/sq ft
Scrim	18 x 9	18 x 9
Available Roll Length	100'	100'
Available Roll Widths	10", 30", 5', 10'	10", 30", 5', 10'
Color	White	White
PVC Film Above Scrim	26 mil	31 mil
