

## Give Your Roof New Life

Duro-Shield™ Roof Coatings Enhance  
the Life of Your Roofing Investment

Duro-Last® offers solutions for all of your roofing needs, including roof coatings and materials. Duro-Shield products are designed to help protect and enhance the performance of commercial roofs.

With constant exposure to heat, cold, UV radiation, rain, snow, hail, high winds and possible mechanical damage, a roof can be the most vulnerable component of a building's exterior.

However, a roof's long-term performance can be enhanced – and major roofing problems avoided – with correct design, quality materials, proper installation and workmanship, and comprehensive care.

The cost of routine care is minimal when compared to the cost of repairing, removing and replacing a damaged roof. Duro-Last offers an entire line of products dedicated to helping you enhance the life cycle of this critical asset.

When properly prepared and applied in accordance with Duro-Last's specifications, the Duro-Shield line of roof coatings can be used on the following roof substrates:

- Single-ply membranes:
  - PVC (polyvinyl chloride)
  - EPDM (ethylene propylene diene monomer)
  - Hypalon CSPE (chlorosulfonated polyethylene)
  - TPO (thermoplastic polyolefin)
- Metal
- Mineral and granule-surface built up (BUR) and modified bitumen
- Smooth-surfaced built up (BUR) and modified bitumen
- Wood

Duro-Shield Roof Coatings are 100% elastomeric acrylic, and are designed to seal and protect a variety of substrates. Their brilliant white finish reflects the sun's rays, which can lower heat buildup and reduce energy costs.

### Duro-Shield™ 5 Roof Coating

Formulated with 30% total solids by volume, a minimum of 20 mils of coverage when dry and a 5-year limited warranty, Duro-Shield 5 is a budget-friendly option for enhancing the performance of commercial roofing systems.

### Duro-Shield™ 10 Roof Coating

With 50.3% total solids by volume, a minimum of 24 mils of coverage when dry and a 10-year limited warranty, Duro-Shield 10 provides excellent coverage for enhancing the lifecycle and performance of commercial roofing systems.

### Duro-Shield™ 20 Roof Coating

Featuring 55.81% total solids by volume, a minimum of 35 mils of coverage when dry, the use of Polyester Reinforcement Fabric during application, and a 20-year limited warranty, Duro-Shield 20 provides the ultimate long-term protection and enhancement to the performance of commercial roofing systems.

\* Each coating can be applied with a brush, roller or airless sprayer.

## More Members of the Duro-Shield Product Family

In addition to the Duro-Shield line of roof coatings, there are other supporting products in the coatings family:

- **Duro-Shield Primer** – Formulated with a rust inhibiting compound, the application of this primer is required on all substrates before using any of the Duro-Shield coatings.
- **Duro-Shield Brush Grade Mastic** – Heavy-bodied, flexible, elastomeric caulk and sealant for filling and patching cracks and voids in various substrates prior to application of Duro-Shield Primer and roof coatings.
- **Polyester Reinforcement Fabric** – Used with Duro-Caulk® Advanced, this flexible polyester fabric creates strong, resilient bonds by reinforcing seams, flashings and penetrations.

## Enhance the Life of Your Roof

The roof is a critical asset in the overall building envelope. With regular care and attention, it can protect your building and the valuable contents inside for years. The Duro-Shield line of coatings offers an additional solution to enhancing the performance of a variety of commercial roofs, extending its lifecycle, and protecting against potential problems and costly repairs.
