Trust the Duro-Last®Cool-Zone® for an energy-efficient roof!

The Duro-Last®
COOL ZONE®
Roofing System

**IT'S THE BEST
THING UNDER
THE SUN!**

THE DURO-LAST® COOL ZONE® ROOFING SYSTEM KEEPS YOUR BUILDING COOLER...

ENERGY-EFFICIENT

The Duro-Last white membrane is highly-reflective throughout its life span on the roof, saving significant energy and money for building owners all over North America.

SUN-PROOF AND LEAK-PROOF

The Cool Zone roofing system is The Proven Performer®. Through independent accelerated weathering tests and projects in the field, our membrane has stayed flexible and watertight. The Cool Zone membrane also resists the negative effects of prolonged ultraviolet exposure and helps reduce heat stress on rooftop equipment.

SOLVING URBAN HEAT ISLAND PROBLEMS

On warm summer days, the air in a city can be 6-8°F hotter than the surrounding countryside. Scientists call these "urban heat islands." The Cool Zone system's highly reflective white membrane can help reduce the urban heat island effect. Your utility or city may even subsidize the use of a Cool Zone roof as an energy-efficient construction project.

DURABLE

The Cool Zone roofing system is fire retardant, resistant to chemicals, grease, high winds, and punctures, and easily accommodates wide temperature extremes. Once installed, a Duro-Last roof is virtually maintenance-free.

...NO MATTER HOW **HOT** THE OUTSIDE TEMPERATURE

CUSTOM PREFABRICATION IS THE DIFFERENCE

Every Cool Zone project is prefabricated to fit each roof precisely. By performing 80-85% of membrane seaming in our controlled factory environment, Duro-Last reduces the potential for rooftop installation errors and leaks.

Also, custom fabricated stacks and curb flashings eliminate the majority of on-site work from the most critical areas of the roof – transitions and penetrations.

BUSINESS AS USUAL

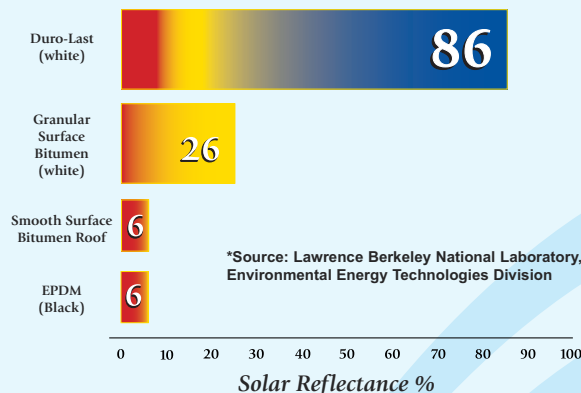

Year-round installation is quiet and safe without loud machinery, hazardous materials, noxious fumes, hot tar or mess. A Cool Zone roof can often be installed over an existing roof without an expensive tear-off, virtually eliminating debris that could disrupt building activities or damage sensitive equipment.

BACKED BY THE INDUSTRY'S BEST WARRANTIES

Our standard, comprehensive 15-Year No Dollar Limit (NDL) Warranty is transferable, has no exclusions for ponding water, and provides coverage against consequential damages that result from material defects and the authorized contractor's installation of Duro-Last products. We also offer 20-year warranties that include 15 years of consequential damage coverage as well as warranties for installations in hail and/or high-wind areas.

GET LONG-TERM VALUE WITH THE DURO-LAST COOL ZONE ROOFING SYSTEM. IT'S THE BEST ROOF UNDER THE SUN.
