

DURO-TECH™ TPO FLEECE 135-MIL (80-MIL) MEMBRANE

DESCRIPTION:

Duro-TECH™ TPO Fleece 135-Mil (80-Mil) (“TPOF135”) is a flexible thermoplastic polyolefin (“TPO”) roofing membrane made for use in Duro-TECH TPO roofing systems. TPOF135 meets or exceeds all requirements for ASTM D6878.

TPOF135 is available as roll goods. A complete line of custom-fabricated accessories and parapets are available for use with TPOF135.

In addition to the fleece, TPOF135 is a TPO membrane which incorporates a polyester reinforcement fabric (weft-inserted scrim) within TPO films to provide exceptional strength and waterproofing.

TPO products are not compatible with PVC products.

TPO Film – Proprietary TPO formulation of resins, thermal, and UV stabilizers, and flame retardants.

- TPO film above scrim – 37 mil (0.94 mm).

Weft-Inserted Scrim – A 9 x 9 polyester fabric construction with weft insertion, provides superior tear and puncture resistance. The polyester thread is treated to prevent wicking.

Fleece – The 8 oz/yd² (0.27 kg/m²) needle-punched polypropylene fleece provides excellent properties for adhering to, or mechanically fastening over, a variety of substrates. Each roll of membrane has one selvage edge where the fleece is held back 2.25 inches (57.2 mm) to provide for hot-air welding to the underlying membrane.

Total Thickness – 80 mil (2.03 mm), nominal.

Overall Thickness (with Fleece) –135 mil (3.43 mm), nominal.

Weight – 0.38 lb/ft² (1.86 kg/m²)

Colors – White, tan, and gray.

ROLL PROPERTIES		
Dimensions ft (m)	Approximate Coverage (3-In. (76.2-mm) Overlap) ft ² (m ²)	Approximate Weight lb (kg)
10 x 50 (3 x 15.2)	482 (44.8)	190 (86.18)

Overlap Line – A line, 6 inches (152.4 mm) from the edge of the sheet, is factory-applied to the top of the sheet to assist in maintaining proper overlap between sheets.

ENERGY EFFICIENCY:

White TPOF135 is an excellent product for complying with California Title 24, LEED®, and other energy efficiency programs requiring the use of a highly reflective roof membrane.

LEED-NC & LEED-EB CREDITS – White TPOF135 membrane alone can obtain one credit in either U.S. Green Building Council’s LEED-NC or LEED-EB programs. In combination with other design criteria, the membrane may help attain many other credits.

LEED-NC Credit Category	Duro-TECH Attribute
Sustainable Sites Heat Island Reduction	Solar Reflective Index (SRI) = 97
LEED-EB Credit Category	Duro-TECH Attribute

STORAGE:

Keep away from ignition sources.

Store rolls lengthwise on pallets. Use tarps to keep rolls dry.

MEMBRANE ATTACHMENT:

Adhered – TPOF135 may be adhered to a variety of roof decks, walls, insulations, or cover boards. It may be adhered directly to an existing built-up roof (“BUR”) by using approved membrane adhesives. Adhesion pull tests are required prior to adhering to BUR. The tests must be performed on a 1- x 1-ft (0.3- x 0.3-m) area and receive minimum values of 150 lb/ft² (732.36 kg/m²). Refer to the Duro-TECH TPO Adhered Roofing System Specification for system requirements.

Mechanically Fastened – TPOF135 may be mechanically fastened to a variety of roof deck and wall materials. An appropriate slip sheet, insulation or cover board may be required. Refer to the Duro-TECH TPO Mechanically Fastened Roofing System Specification for system requirements.

PHYSICAL PROPERTIES:

TPOF135 has been subjected to the tests required by ASTM D6878 “Standard Specification for Thermoplastic Polyolefin Based Sheet Roofing”. The results of each test are listed below. ASTM’s Overall Thickness requirements for the membrane are plus or minus 10% (nominal) of the listed Typical Value.

PHYSICAL PROPERTIES
