

Duro-TECH™ TPO and Duro-TECH Fleece TPO Membranes

Duro-TECH provides a cost-effective roll good solution and features the thickest performance layer in the industry for added durability. Installing Duro-TECH can save time as it does not require seam sealant where membranes meet thanks to the densely woven anti-wicking scrim. This high-performing scrim prevents moisture from being pulled under the membrane, ultimately saving on potentially costly roof repairs down the road. Available in 45, 60 or 80 mil thicknesses, Duro-TECH can be mechanically fastened, induction-welded or adhered over a variety of roof substrates.

Duro-TECH Fleece combines the Duro-TECH membrane with an 8 oz./yd.² high-quality fleece material on the underside for enhanced puncture protection. Duro-TECH Fleece can be mechanically fastened or adhered over a variety of roof substrates.

Custom-Fabricated Accessories

A complete line of custom-fabricated TPO accessories is available for both Duro-TECH and Duro-TECH Fleece membranes, reducing labor and the potential for leaks at critical transition areas of the roof.

Comprehensive Warranty Coverage

Multiple warranty options are available for Duro-TECH and Duro-TECH Fleece installations, including our Basic, Ultra and Residential warranties. Hail and High Wind warranties are also available. Consequential damage coverage will not be offered for Duro-TECH or Duro-TECH Fleece installations.
